

FARAZ ANSARI

Frontend Developer · React & React Native

Mumbai, Maharashtra | +91 93720 86854 | raibansari919@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Performance-driven Frontend Developer with ~2 years of experience crafting high-performance, scalable UIs using React.js and React Native. Proven track record of leading frontend architecture on enterprise-grade data platforms, building custom grid and workflow solutions that directly reduced licensing costs, and delivering complex mobile applications end-to-end. Currently deepening core computer science foundations through intensive DSA study; actively seeking frontend or full-stack roles where UI craft and performance engineering are valued.

WORK EXPERIENCE

Software Engineer (Frontend Lead) · Arysoft Global Services Pvt. Ltd.

April 2024 – Feb 2026

XJOINS — Enterprise ETL & Data Integration Platform

- Led end-to-end frontend architecture using React.js, TanStack Query, AG Grid, Handsontable, and React Flow to build a datadriven ETL interface capable of handling large datasets with optimised async rendering.
- Engineered a custom AG Grid implementation with multi-select, pivot tables, and Excel-style filtering — replacing a paid grid solution and saving ~\$1,000/year in licensing costs.
- Built a full in-browser Excel editor and preview tool using Handsontable with ribbon-style formatting, filtering, and cellediting, enabling seamless spreadsheet workflows on large datasets.
- Designed a scalable, node-based workflow canvas with React Flow to visualise and manage complex data pipelines.

School Management System — React Native Mobile App

- Built student and staff management features including attendance tracking, timetable scheduling, and a real-time parent/student portal for grades and assignments.
- Implemented live map integration and bus-tracking UI; optimised animations with React Native Reanimated for smooth performance across low-end devices.

Aryventory — Inventory Management System (Operations Module)

- Built dynamic, real-time stock-movement tracking UI with custom dashboards, data visualisation components, and AG Gridpowered operational views.
- Integrated REST APIs end-to-end, implementing reusable component architecture and Context API state management for maintainable, scalable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, React Native, Next.js, Redux Toolkit, TanStack Query, GSAP, React Native Reanimated, Context API

Data & Grids: AG Grid, Handsontable, React Flow

Tools & Platforms: Git, GitHub, Figma, Postman, Swagger

Practices: REST API integration, Component-driven architecture, Async/performance optimisation, Responsive & mobile-first UI

CONTINUOUS LEARNING

DSA & Algorithms Deep-Dive · Feb 2024 – Present

- Solved 250+ coding problems across LeetCode and Take U Forward (TUF), strengthening problem-solving skills and core computer science fundamentals.
- Profiles : [LeetCode](#) | [Take U Forward \(TUF\)](#)

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Tilak Maharashtra Vidyapeeth, Pune.
